RUTHMANN COCKPIT

Movement rediscovered
for T- and TU-series

RUTHMANN Cockpit

Movement rediscovered

Information area with Visual, full-colour display* with 10 menu buttons and 7 hot keys

The menu buttons allow users to quickly navigate through the information and diagnostic system without any degree of difficulty. All important information is available at the push of a button. Three display modes ensure good readability during the day, at night, and in bright sunlight.

Control area includes 2 joysticks and 16 function keys.

The STEIGER® can be operated using familiar icons and control functions. Centralized control elements on 16 function keys and joysticks with even greater sensitivity, further facilitate ease of operation.

Ergonomic hand rest ensures a more relaxed working environment

The ergonomic hand rest provides enhanced comfort at the jobsite. Furthermore, it reduces the risk of faulty operation/accidental misuse.

Emergency stop button + up to 7 push buttons

Quick access to the illuminated emergency shut-off switch for even greater safety at the jobsite. 2 push buttons control up to 5 additional features (e.g. turning a flood light on/off).

Backlit keys and status LED

Assignments carried out in the dark or in limited daylight can be carried out easily and safely. All keys are backlit. Status LEDs indicate movements and switching statuses.

1 built in socket 230 V 1 flange socket 12/24 V 2 additional sockets possible

The standard version comes with 2 pre-installed sockets. 2 additional sockets can be retrofitted.

Easy to operate,
even with work gloves!

Cockpit for every type of assignment

The **RUTHMANN** Cockpit is available in a variety of different versions. Depending on the model, the Cockpit is equipped with/without the display (see offers).

The Cockpit is available on all STEIGER® models in the T-series.

Closed protective cover

The **RUTHMANN** Cockpit is insulated in accordance with the DIN VDE 0682-742 safety regulation (aerial devices for working on live parts with voltages up to AC 1000 V and DC 1500 V). The Cockpit was designed and developed with customers in mind and is extremely user-friendly. All components are maintenance free and if required, can quickly be replaced individually without any degree of difficulty.

Quick and Easy

Thanks to the full-colour graphic display, operating the STEIGER® is easier, safer and more intuitive than ever before.

Using the 7 hot keys, all of the STEIGER®'s important data (e.g. vehicle information, outrigger and boom position) is available at the push of a button. The hot keys also provide operating instructions and allow users to adjust the display modes – daytime, nighttime, and contrast settings.

In addition to the hot keys, users also have 10 menu buttons at their disposal. Familiar icons allow operators to easily navigate through the menu of the information and diagnostic system.

In the menu, users will find a lot of additional information and settings (language, etc.).
